Ratio Study Analysis: A ratio study is designed to evaluate appraisal performance through a comparison of appraised or assessed values for tax purposes with estimates of market value based on sales prices, and tested by measures of central tendency. The Galveston Central Appraisal District will adhere to the IAAO Standards on ratio studies. Those statistics include current measures of Central Tendency by CAD and Measures of Dispersion as required by law.

New Construction: Building Permits are gathered from Galveston County and all of the cities located in the appraisal district. Data collection in the field requires preparation of maps, computer generated appraisal cards, and coordination of appropriate staff members to begin the process. Properties are grouped in type, location, and neighborhood prior to the start of the fieldwork. This process requires coordination and supervision during all phases. Fieldwork is distributed to appraisers based on property type and location. Often, field appraisers are

trained in the techniques of listing, measuring, classifying, and appraising of property. Depreciation is also considered during the field inspection phase of the appraisal process. A breakdown of New Construction totals for 2019 can be found on the Effective Tax Rate Report.
